CERTIFICATE OF ORIGIN and
STATEMENT OF PURITY

This letter shall certify that all egg products manufactured by Ballas Egg Products Corp. are produced in the United States of America at the facility address listed above. All shell eggs used to manufacture these products originate from farms in the United States of America. All products that we supply are processed and pasteurized under the supervision of the United States Department of Agriculture (USDA/FSIS) in accordance with 9CFR590.

All of the egg products that we manufacture meet the standards of identity as described in 21CFR160. None of the egg products we manufacture contain any ingredient or additive other than what is listed on the product specification sheet for that product (see www.ballasegg.com). None of the egg products that we manufacture contain any raw material or ingredient that was produced in China. None of the egg products that we manufacture contains any melamine or any of its derivatives.

All of the plastic bags used by Ballas Egg Products Corp. are made from FDA-approved polyethylene in accordance with 21CFR177. No Bisphenol-A (BPA) is used to manufacture or is contained in any of the materials used to package our egg products.
